A part of the sharing economy

Wikipedia:

- **Sharing economy** is a term for a way of distributing goods and services, a way that differs from the traditional model of corporations hiring employees and selling products to consumers. In the sharing economy, individuals are said to rent or "share" things like their cars, homes and personal time to other individuals in a peer-to-peer fashion.
- Some of the competition comes from individuals instead of enterprises
- Platforms: Airbnb, Booking.com, hometogo.com etc.

How about Airbnb in Sweden?

- **Not as widespread as in many other countries**
- Few people in Sweden own their apartment (rentals or housing societies)
- Strict rules against subleasing of apartments in real estate enterprises with renting tenants
- The boards in housing societies often decide to have a prohibition against subleasing
- **Results in a limited market for Airbnb, especially in the city areas**

Sweden rents out entire country on Airbnb to encourage tourism

Need an unconventional vacation? All of Sweden is available on Air...

Black market

- Investigation by the Tax Authority in 2017
- 80 per cent of the persons with income from subleasing above the limit for paying tax did not report this
- Limit 40 000 SEK (4 150 EUR)

Crazy Swedes?
